Recent ASSE Meeting In North Little Rock
Two types of establishments are expected to continue submitting 300A summary forms electronically: those with 250 or more employees, as well as those with between 20 and 249 employees in high-hazard industries who are expected to submit their calendar year 2017 summaries by July 1, 2018. After that, beginning in 2019 and for every year afterwards, these worksites would be required to submit the information by March 2. The new Electronic Filing requirement applies to establishments of either 1) 250 or more employees, or 2) between 20 and 249 employees primarily in NAICS Codes 31-33 (manufacturing), and 23 (construction), and you are only required to submit the OSHA 300A annual summary.

The Recordkeeping Page on the OSHA Website has a link to the Injury Tracking Application where you can submit your OSHA 300A annual summary.
So far this has been a great year for the Chapter! For those that don’t know, we have a points based system that we report to Society to determine how active we are as a Chapter. The points make us either a Bronze, Silver, Gold or Platinum level chapter. When the current Executive Committee first took over last year, we as a Chapter barely made Bronze. I’m happy to report that with this year’s activities we are on track to reach Platinum! It hasn’t been easy and there is still much work that we as an Executive Committee for the Chapter have to do for the remainder of this year and going into next year.

One of the other areas that I’m proud of is the growth of our membership. Last year when we took office we had 162 members on our roster and this past month we just had our 200th member join. This has come in part to our relationships that we have built with the OSHA Little Rock Area office and the Arkansas Department of Labor. Leadership of both organizations have been fantastic partners for getting us involved in various safety programs occurring around the state. Many of these events have been posted to our Events page on our website Arkansas.asse.org. We have recently updated our events page to a calendar format based on feedback from members.

An area that I would like to improve on is Communication. How do we better serve you as our members? We will be sending out another survey in the coming weeks to help us plan for next year and search for training to provide. This survey is a form of communication to learn how we can better serve the Chapter. We are here to serve you and provide an ROI on your investment to being an ASSE member. ASSE is more than the Annual Safety Conference or Seminar Fest, we are a community of Safety Professionals (hence the upcoming name change) that can affect safety in our state and make all of our workplaces safer.

I am honored to serve our 200 members and continue to grow the Chapter and make the wonderful State of Arkansas a safer place to work.

Sincerely,

Josh Tims
The Arkansas Chapter of ASSE has reached a milestone with 200 members.
